

Australian Daily Education News Update Online

Since late May 2006, the PLATO website home page has included a **Breaking News** section.

All of the day's relevant education news, from all Australian daily newspapers, several US and UK newspapers, and radio / TV, are added each day. Extracts from each article, and a link to the source article (if available), are provided.

After two days, all stories are placed in a searchable education news archive.

All teachers, students and parents are welcome to use this facility whenever they wish: there is no cost, registration or login required.

This service is available at
